

2024 TSHHRAE Wage and Benefit Survey AVAILABLE

The **2024 Texas Society for Healthcare Human Resources Administration and Education (TSHHRAE) Wage and Benefit Survey** is now available.

This survey is part of a continuing effort to provide human resource-related consulting services and support to the Texas healthcare community. Please take a moment to review this brochure outlining highlights from the survey and contact us if you need additional information. To purchase the survey, complete the enclosed order form and mail or email it to Werling Associates, Inc. Otherwise visit our website to purchase, werling.com

SPONSORSHIP

Werling Associates, Inc. would like to thank all participants for making this survey possible. In addition, we would like to thank the Texas Society for Healthcare Human Resources Administration and Education (TSHHRAE) for sponsoring the survey.

TIMING OF SURVEY

Wage data is reported as of February 1, 2024 and published on June 1, 2024.

REPORT

The 2024 TSHHRAE Wage and Benefit Survey provides comprehensive information on 404 positions in the healthcare field. Surveys were sent to hospitals and other healthcare organizations throughout Texas. The report includes data from 53 organizations, encompassing 261 locations, and reporting data on 143,291 incumbents in the healthcare field. Please refer to the participant list for a complete list of the organizations, by location, included in this year's report.

The survey report provides the job number, job title, job description, and minimum education and/or certification for each position. Data includes the number of organizations reporting data and the total number of employees for each job. Wage information reported for hourly base pay and hourly total compensation includes: average pay, 10th percentile, 25th percentile, median, 75th percentile, and 90th percentile. In accordance with the Department of Justice wage survey guidelines for safe harbor, results are provided where at least five organizations reported wage data. All individual participant's data is kept confidential.

METHOD OF DATA COLLECTION AND ANALYSIS

The survey data was gathered from questionnaires submitted by e-mail. Participants were asked to report data where at least 80% of the duties described are performed by the incumbent(s).

DATA INTERPRETATION

As with any survey, the information contained in the report must be interpreted with caution. Even with proper job matches, the reported wages reflect differentials based on a broad range of seniority and experience, job responsibility, organizational size, geographical differences and differences in pay policies. Users should take these differences into consideration when establishing pay rates.
